Safe use of rules

Must by adults on the local assembly, please check whether the device and circuit assembly assembly process correctly.
Default is banned in the streets, highways, landslides on other dangerous places.
Children must be under the custody of adult use.
When used on the local please do not usually change device.
Please check the battery, line, plastic and other parts for damage and found damaged, please stop using in time.
When use, shall not the frequently switch forward backward function.
The rechargeable battery can't charge.
Should be in the right electrode in the battery.
Run out of battery should be removed from the toy.
The power terminals shall not be short

Charging matters needing attention

1, using electric vehicles for the first time or charging first Charging or at full, charging charging Cover first then put the plug in the charging socket, then the charger plugged in. (charging must be made into due, do not let your caretaker's access to power supply)
2, please recharge immediately when electric vehicle driving speed slowed significantly, continuous Charging 8 to 10 hours, not more than 10 small at the right time.
3, in the process of charging the charger to battery temperature (under 60 °) are Normal.
4, the electric car must use local car equipped with dedicated charger and battery, so as not to Damage the charger and battery and electric circuit.
5, the electric vehicle charging shall not do any operation.
6, please a mixture of old and new or different types of batteries.
7, electric vehicle charging, please check whether the circuit connection is correct.
8, when the electric conductor time when not in use, must charge at least once every month.

Warning: electric car used on more private places, may lead to drowning, burns, falls and other hazards.

STANDARDS:EN71、EN62115

Install and use the manual

ELECTRIC CAR

Manual has an important information, read, please keep for future reference.

USE CAUTIONS

1.In the first to use the deposit, we must ensure that the cell battery up to 10 hours. otherwise, permanent damage cells and beyond repair.
2.In the streets, roads, slope, ditch and the danger area.
3.Please don't on the polished surface, such as marble,tile on the surface.
4.This product by one, not limit, the greatest relief to over 30KG.
5.Don't run in an electric switch on deposit in the back of the light switch.
6.Shall not be altered the car circuit or device to additional charged
7.The remote control and not to let it get caught in the rain or otherwise made in water and keep away from sources of ignition to avoid causing the damage.
8.Met with obstruction, the baby stop, please leave the obstacles to ride.
9.Don't use in the water, water and other liquids in the car.
10.Not in use, to avoid hitting the child.
11.When the remote control battery power is low, the car on the remote control and turned back, a short distance, shake, please replace the battery!
12.Not in use, please turn off the switch. no, please unplug the battery, a connector.
13. The types of batteries that may be used.
14. How to remove and insert the batteries.
15. Non-rechargeable batteries are not to be recharged.
16. rechargeable batteries are only to be charged under adult supervision(for toys suppliedwith a battery charger for use by children, this in struction may be replaced by " Batteriesare only to be charged by adults or by children at least 8 years old")
17. Rechargeable batteries are to be removde from the toy before being charged.
18. Different types of batteries or new and used batteries are not to be mixed.
19. Batteries are to be inserted with the correct polarity.

TROUBLESHOOTING

PROBLEM	ANALYZE	SOLUTION
Car doesn't work	• Low power	Recharge the battery
	• Damage of thermic fuse	Change with name thermic fuse
	• Loose or wheel nut	use new nut
	• Loose of battery connector	Put on the connector
	• Damage on electrical parts	Go to repair shop
	• Damage on motor	Change new battery
	• Damage on battery connector	Go to repair shop
	• Loose of the battery connector	Tighten the connector
Battery can't be recharged	• Charger doesn't plug the power	Plug charger with power
	• Damage of charger	Change the charger
	• Battery with lower power	Recharge the battery fully
Short of run time	• Battery is old	Change new battery
Noise & heat during recharge	• It's chemical process	It's normal & safety
	• Old battery	use new battery
Low Speed	• Low power	Recharge the battery fully
	• Over burden	Reduce burden under 25KG
Noise of gear box	• Damage of gear box	Go to repair shop
	• Damage on motor	Go to repair shop
	• Run on not flat ground	Run on flat ground
Car drive when turning	• Bad connect of motor wire	Reconnect the wire
No sound & light when running	• Loose of sound & light board	Connect the wire
	• Damage of sound & light board	Go to repair shop
Car can't stop in run	• Damage of electrical parts	Go to repair shop
	• Remote control battery exhaust	Change battery
Unusal working condition under remote control	• Remote control out of distance	Keep near distance between car and remote control
	• Damage of remote control	Change of remote control
	• Damage of receiver board	Change receiver board
	• Disturb of magnetic field	Far away from magnetic field

CHARGE METHOD

1.First to use please open the cushion , and the battery connections with main distributing frame, with red in red and black in black, not a line ends meet, or cause a short-circuit.
2.Charging socket the cushion down side, and needs recharging. charger plug in the outlet, then insert the power outlet.
3.The train slowly, in charge, the time for 8-10 hours, and not more than ten hours.
4.In the first to use the deposit, we must ensure that the cell battery up to 10 hours. otherwise, permanent damage cells and beyond repair.
5.Charging devices or battery which has a fever (60 C) are normal.
6.The electric baby must use this car is equipped with the charger and the battery, in the case of broken the cell phone chargers and the counter-voltage or an electric circuit.
7.Have to recharge the batteries to be recharged from the toy the use of battery.
8.Not mixed with the old and new or different types of batteries.
9.Can't insert the battery wire connector.
10.When the baby is not use for a long time, at least once every month to charge.
11.Toys can't connect to the surplus on the use of the recommended amount.
12.When the car is charging,can't use it.

PACKING LIST

★ Car body (polypropylene)	1PC	★ Charger	1PC
★ The steering wheel	1PC	★ MP3 connector	1PC
★ Chair	1PC	★ Manual	1PC
★ Car wheel, blocks	4PCS	★ Remote controller	1PC

Using The Matters Needing Attention

Products should be assembled by adult right before use.
Battery charging should be carried out by adults, must first be charged before using this product.
The first use of electric vehicles, must ensure that the battery full 10 hours! Otherwise it would be permanent damage
Pool and beyond repair.
Please don't in the street, the road, landslides and other dangerous places, and be sure to use under adult supervision.
This product is limited to a person, do not overload, the largest capacity of 30 kg.
Please fasten your seat belt, and make sure that your baby is always sat on the bench, at the same time, please do not let the baby in
Runtime stand or do some dangerous action.
Please don't suddenly change in the process of electric vehicles run forward/backward switch.
To prevent collisions with valuables, please do not use in a relatively narrow space, in order to avoid damage to electric vehicles.
Please check the product and the charger, check the wires, plugs, shell packaging and other components
Damaged, found that the damage should stop using, to be repaired before use.
When not in use for a long time, please turn the power off and remove the battery connector.
Children must use under adult supervision.
Safe use period: three years.

Please do not use in the streets, roads, landslides and other dangerous places, and must be used under adult guardianship.
The toy should be used with caution since skill is required to avoid falls or collisions causing injury to the user or third parties.

Install the front Wheel

On the gasket, we bring a the random into the front wheels, then the front wheel and the gasket, with nut wrench should be tied, cover the cap. About the same installation (as shown in figure 1)

Install the rear Wheel

Will first car body over, remove manual clamping spring and baking finish, and then put a spring washer and nut. Then put the front axle fixed on both body card slot, then put the front axle through a hole in the rear axle, gear box positioning in the car, and then the connectors on the gear box connected to car connector, then insert the wheel shaft, set into big gasket, then fix fixed with a locking. Finally cover the wheel cover. (as shown in figure 2)

Install the rear view mirror

Justify the rearview mirror around first, and then corresponding attention on the car body, right clasp screws that are flat on place. (as shown in figure 3)

Use the product please first read instructions,it will tell you the correct methods of operation and installation instructions.To avoid not correct methods of operation of this product damage or injury and your baby. Manual should be placed to take good care of.
It's STANDARD NO.:EN71 EN62115

The product to get c is the main ingredients of the important parts.

SPECIFICATION

Battery	2*6V4. 5AH
Motor	12V30W、12V15W
Charger	Input:AC220V-240V、50HZ-60HZ,Output:DC12V1A
Maxmium load	30 KG
Work Time	Recharge 8-12h,Use for 1-2h
Speed	3-5 KM/H
Age	37 months - 96months
R/C Battery	AAA 1.5V * 2
R/C Distance	15±5M

SAFE RULES

⚠Warrnning **Non-transportation, must be care of adult! Before using the child for education, safety!**

1.Be charged by an adult, don't let the children touch.
2.Driving, we must by adults, and the tutelage use.
3.Clamp down on the streets, roads, slope, waiting for over a backward, to eliminate obstacles to ride.
4.It's suitable for children for about 37-96 months.
5.Cycle shall not leave the seat to prevent operation resulting in injury.
6.In the car was pulled, the device, such as a block, please immediately release switch to eliminate the obstacles and foot before you ride.

UNIT MOUNT

Install the steering wheel

Will line connectors and direction of the direction of dish stem the connectors are connected (the that the steering wheel in the direction of the pole, with the connect the positive and negative). Then put the steering wheel and direction in turn. (as shown in figure 4)

Changing Instructions

Before installing seat first connect positive, and then put the seat fixed on both sides of the hole with screw double tightened when changing, open cover during fill out, then insert the charger to charge hole, when changing the vehicle without any function. (as shown in figure 5)

Remote control battery installation

Use the screwdriver to unscrew the screw on the battery cover, then take out the battery installation, and battery cover and screw locking. (see figure 6)
